

September 21, 2021 Board of Education Statement

Masks are for those who are ill, not healthy. When children wear masks they end up touching their faces more frequently, which could lead to infection. They also re-breathe particles that their lungs have exhaled. Additionally, the masks that children are wearing impede oxygen flow and aren't porous enough to allow carbon dioxide to fully dissipate. All of these things Decrease the body's immune response. Forcing children to abide by measures that restrict their ability to move freely throughout society without discrimination is unconstitutional. Prohibiting children from entering or participating in taxpayer supported education (also known as a free and appropriate education) is unconstitutional.

Forcing children to wear a mask for 7-8 hours a day is CHILD ABUSE. If there was a legitimate concern over Covid being a Health Safety issue, schools would never be operating in person, because why risk the exposure. So when a mother tells her child that he needs to wear a mask again this school year and her son says, "Don't worry Mommy, I can always breathe at lunchtime." Don't tell me we aren't abusing our children. Don't tell me children are resilient because we are raising them in a time that they will need to recover from when they are older.

Policies that mandate compliance that for the greater good are dangerous . One person's health cannot be sacrificed for another's, and no one's life should be privileged over another's. The decision to wear a mask must be a personal one and should not be mandated. Measures that are meant to protect the community as a whole are ineffective if they hurt individuals within the community.

Let me be clear: You have not made ANY hard decisions. You were told by the State what to do under threat of consequence, and that is CONTROL. You folded like a deck of cards when you should have stood up for the families, especially the children, under your watch to say Enough is Enough. The lack of pushback on these mandates will only serve as the catalyst for more mandates from the state under the means of "safety in schools". Today it is Mandatory masking for our children. Tomorrow it will be mandatory experimental drugs... and I for one WILL NOT ALLOW any more of this Unconstitutional behavior to continue.

I need each and every one of you to take a long hard look at the people here today, Parents, caregivers, family, friends, and tax payers. We are all ANGRY and we are saying ENOUGH is ENOUGH! You now have a choice. You can either choose to fight with us against the State or you can continue to cower behind your masks and your tyrannical control, but mark my words, you won't be sitting there for long. There are 4 seats up for reelection next year. Those of you who are up for reelection better think long and hard about the choices you're making today, because I guarantee they will affect you next year. We're coming for your seats.

These masks are not a protective measure against Covid... these are symbols of control and unquestioning compliance that will never end unless you as our Voice for the county put your foot down. You have failed our children this last year... the question we are all wondering is, will you continue to fail them or will you stand up for what is right?
